GLOSSARY

- 1 NO NO. - When this notation appears in the Part No. column, it denotes a part or group of parts that have not been assigned a part number or which are not recommended for field replacement.
- 2 NR - This notation in the Part No. column denotes a part not recommended for field replacement.
- 3 NP - This notation in the Part No. or Description column indicates parts that are non-procurable. In these cases the next higher assembly should be ordered.
- 4 AR - The notation AR in the Units Per Asm. column indicates that the quantity of the part is used as required.
- 5 SIMILAR ASSEMBLIES - If two or more assemblies contain a majority of identical parts, they are combined in the same listing. Parts common to assemblies are illustrated and listed by one index number. Parts peculiar to one or the other of the assemblies are listed separately and identified either in the description of the part, or by a descriptive trailer line.

- 6 REF - The notation REF in the Units Per Asm. column indicates that the listing of the assembly is repeated and reference should be made to its previous listing for the quantity required.

- 7 INDENTURE - The indentation of items under the numerals 1 through 4 at the head of the Description column shows the relationship between assemblies, subassemblies and detail parts. For example:

1 2 3 4

(No dot) **MAIN ASSEMBLY**
 (One dot) • Detail parts of main assembly
 (One dot) • Assembly within main assembly
 (Two dot) • • Detail part of one dot assembly
 (Two dot) • • Assembly within one dot assembly
 (Three dot) • • • Detail parts of two dot assembly

- 8 ATT PT - This notation in the Description column is used to denote hardware that attaches assemblies, subassemblies and detail parts to the next higher assembly. The attaching hardware is listed immediately following the part to be attached.

Note: Space left for customizing glossary terms if required.
